

## Update Your Lights

Replace **10** lights with compact fluorescents (CFLs), or as the kids say, "**twisty bulbs!**"

CFLs use **25%** of the energy of incandescents, and come in most shapes, watts and colors.

All components of a CFL bulb are **recyclable**—including the mercury— and can be reused for new bulbs. Bring CFLs to your local recycle center or one of many retail outlets for recycling.

**1,780 lbs!**
