

Water-Wise in the Garden

400 lbs!

Practice these water-wise gardening tips:

- Water **early or late** in the day to reduce evaporation.
- **Reduce** watering time 2-5 minutes for every 10 min you currently water. Most of us over-water by a whopping 50%.
- Use and maintain a **drip irrigation** system.

50% of household water is used for irrigation.
Extra credit: replace your lawn with drought resistant vegetation.
