

## Cut Kitchen Waste

**214 lbs!**

Switch from **paper napkins** and towels to cloth, and stop 1,000's of napkins from going into landfills.

Despite the extra laundry— you'll save 214 lbs. of carbon and add a touch of elegance to dining.

**1,400 lbs!**

Commit to **composting** your biodegradable table scraps in your backyard, kitchen or curbside—and reduce your **footprint** by 1,400 lbs.

Plant waste turns to CO<sub>2</sub> and methane in landfills. By composting you're allowing **nature's recycling** to take place.
