

Become an Energy "Sealer"

save **935 lbs** CO₂!

Improve your home heating and cooling system just by sealing the air ducts in your attics and crawl space.

In a typical home the ducts that move air through your house are the main place where heat can escape and up to 20% is lost.

By sealing the ducts and insulating them, you can shrink your utility bill footprint by 10%.

save **\$122/year**
