

## Recycle More Paper

save **300 lbs** CO<sub>2</sub>!

**Fact:** Did you know that even though most people recycle some of their trash, 44% of all paper still gets dumped in the garbage?

**Act:** If you remember to *recycle every scrap of paper*, you'll save energy, trees and reduce your carbon emissions. We don't even have trees in the Arctic, but I know they are too awesome to waste!
