

Cut Your Trash in half

save **1,300 lbs** CO₂ a year!

Fact: Every pound of garbage you put in your trashcan goes to a landfill and turns into a pound of CO₂ in the atmosphere.

Act: Switch to a smaller trash can, and commit to a smaller amount of waste. *By recycling more of your waste and reducing your consumption of disposable products*, you can go from a 64 gallon garbage can to a 32 or even a 20 gallon can!

save \$150/year

Cut Your Trash in half
