

## Power Down Video Games

save up to **400 lbs** CO<sub>2</sub> a year!

**Fact:** Did you know your video games use power even when turned off? I'm just a cub, and it makes no sense to me, but it's true!

**Act:** To stop this power drain, plug video games into a power strip and *turn it off when you're done.*

Your friend,  
**Koda**
