

## Product Stewardship

**Fact:** Not all products are created equal; some companies choose to make products which biodegrade or use renewable resources. Product stewardship is a product-centered approach to environmental protection.

**Act:** Exercise your eco-friendly purchasing power: *Look for products made from recyclable or biodegradable materials* or which can be returned to the manufacturer. Visit [climatecounts.org](http://climatecounts.org) to see the eco-ratings of popular brands and to contact companies urging them to establish more sustainable practices.
