

Television Off Twice

save **841 lbs** CO₂!

Fact: Did you know that most TV's still use energy even when turned off? This seems weird to me, but I'm just a polar bear cub. What do I know?!

Act: Always turn off TV AND be sure to have it connected to a power strip and turn that off, too. *Otherwise, the TV will still use power.*

Your friend,
Koda

Television Off Twice

Name: _____

Grade: _____

I pledge to turn the TV off and
shut it down
