

Tune in to your Car

save
up to **3,500 lbs CO₂!**

Fact: A well-maintained and properly tuned-up car uses less gas to get places, and lowers your carbon footprint.

Act *Stay on top of your car's maintenance* by getting regular tune ups; replacing old spark plugs, oxygen sensors, air filters, hoses and belts, and getting regular oil changes, all help shed some serious CO₂ output from your vehicle.
